

The Fable of Jimini Crowket

As a young baby bird--from the wild he was taken!
Away from his parents---who were angry and shaken!

He was learning to fly and on the ground he did hop!
But then along came a human-----and his crow life then stopped!

For a bird of his age takes a few weeks to fly!
And if not successful---most surely will die.

But Jimini was stolen---and robbed of his days!
And now he is trapped here---- in non bird like ways.

If you find such a bird---on the ground---who is learning...
But you're not sure it's a fledgling--- and that question is burning...

Then THAT is the time--- to call Messinger Woods--
To learn what to do!!! And all that you should!!!

He now spends his life----teaching people such lessons...
So listen up quickly, cuz' the bird is not messing!

He's smarter than most and knows where you've been.
So heed his fair warning and do right by his kin!

And if ---STILL--- you're not "hearing", he may peck your head!
But if you paid close attention---he'll say, "What's up?" instead!
